Hizkia Portfolio

Fresh Graduate · 2026

I graduated from Universitas Sumatera Utara (USU) in 2026 with a Diploma (D3) in Informatics Engineering. I'm passionate about software development and building modern web applications while continuously improving my technical skills.

01

Software Development

Interested in building modern, responsive, and maintainable web applications.

02

Continuous Learning

Always exploring new technologies and improving my problem-solving skills.

03

Career Growth

Looking for opportunities to gain practical experience and grow as a developer.

Engineering. Achieved a GPA of 3.73/4.00 and am ready to apply my technical knowledge and grow as a software developer.

Open to Opportunities

SELECTED WORKS

Things I've built.

A collection of projects showcasing my skills, creativity, and journey as a software developer.

01 FULL-STACK DEVELOPMENT

InvenTrack — Inventory Management System

Developed InvenTrack, a web-based inventory management system for managing item data and monitoring stock movements. The system supports incoming (IN) and outgoing (OUT) stock transactions with COMPLETED and CANCELLED statuses, stock movement history, Excel report exports, and interactive charts for inventory reporting. It also implements role-based access for Admin and Staff to support different levels of access.

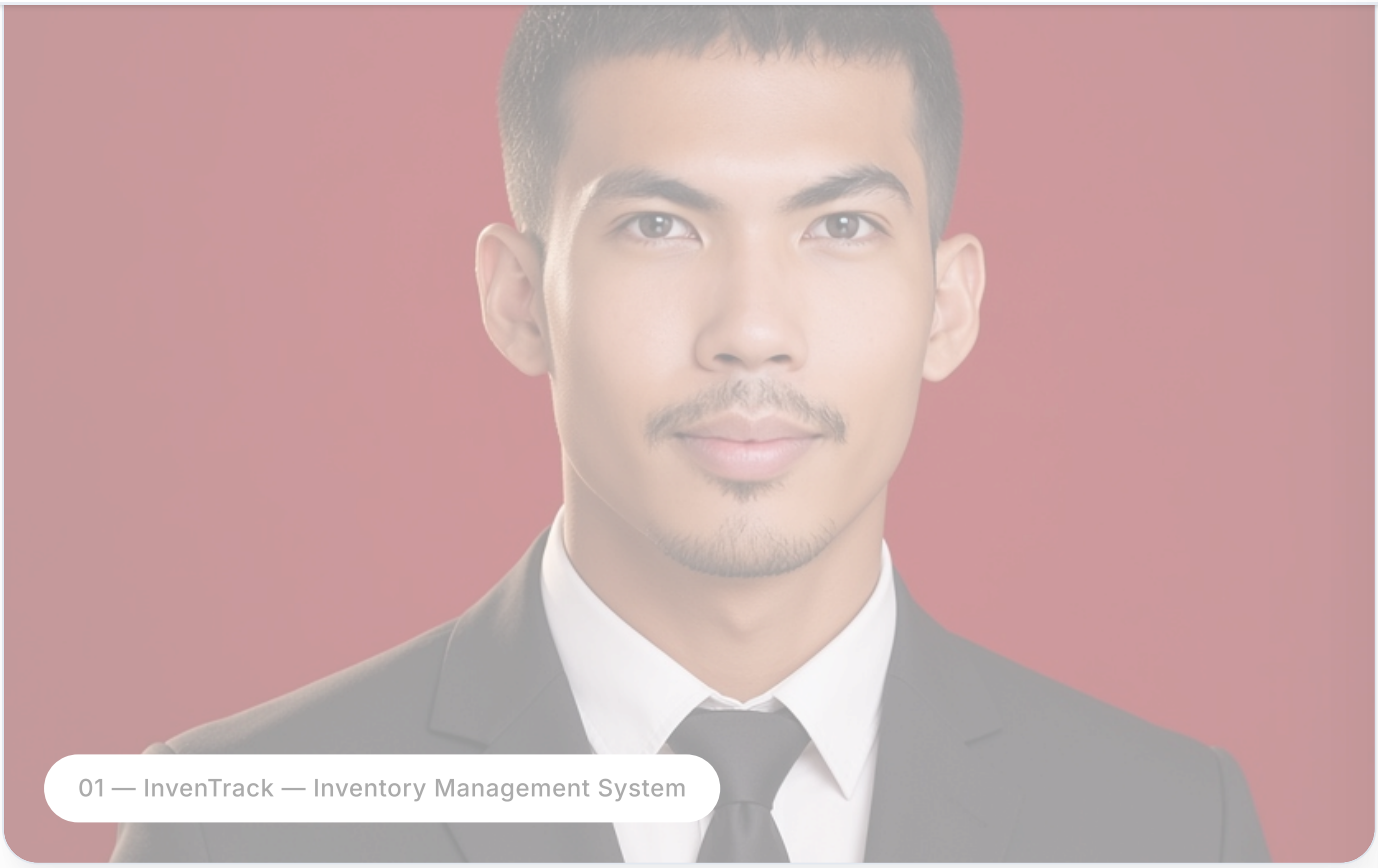

TECHNOLOGIES

React Vite TypeScript Node.js Express.js Prisma ORM MySQL

PROJECT 01 / 03

02

FULL-STACK DEVELOPMENT

HR Employee — Attendance Management System

Developed a web-based HR employee attendance management system to manage employee attendance records and leave requests. The system supports two roles, Admin and Staff, with role-based access control. Employees can record and track their attendance, submit leave requests, and view their attendance history, while Admins can manage employee attendance, review leave requests, and export attendance reports by date range to Excel.
